Snapshot date: 1778703475.995489

Update cadence: last Saturday of each month

Scope:

Subject counties (sale area): Pecos, Reeves, Ward

Active Permian peer: Midland, Martin, Reagan

Date range: 1993-01 through latest PDQ cycle.

Aggregation:

County-level monthly production summed across all leases per county (OG_COUNTY_CYCLE_DATA_TABLE.dsv). Lease-level totals via OG_COUNTY_LEASE_CYCLE_DATA_TABLE.dsv. Operator-level totals via OG_OPERATOR_DW_DATA_TABLE.dsv lookups.

Notes:

- Oil + gas are reported volumes (bbl, mcf). No price adjustment.
- BOE = $\text{oil_bbl} + \text{gas_mcf}/6$ (standard energy-equivalent ratio).
- Per-county-per-year normalization uses the actual county count per side (3 subject / 3 peer).
- Cyclical month-level seasonality not removed.
